short answer

Formative assessment

How's it going so far?

- **Create a logical learning pathway**: Sequence content and interactive activities into your session, in bite-size chunks

- **Let them know how they're doing**: Whether your feedback is for everyone, for groups or individuals, you can keep it personal, make it instant, automate it for efficiency

- **Choose to grade or not**: Either way, you can keep an eye on students' progress, and they can keep and review their responses

- **Have you thought of these?** Flash cards, Turning Point voting pads, bespoke interactive Flash activities... talk to us about what could work for you
