---

## *Top Ten Hints and Tips*

---

- 1 At the start of the unit and in the course handbook, make sure students are aware of the methods by which they will receive feedback, the forms it will take and when to expect it
- 2 A section within Blackboard can outline this information for students
- 3 Make sure your students are aware of the grading criteria for each assignment
- 4 Discuss learning outcomes and assessment criteria with students, so they understand what is expected of them
- 5 Feedback should identify strengths and weaknesses of an assignment in relation to the assessment criteria
- 6 Ensure that your feedback agrees with the grade awarded, so that students can understand why they got the mark they did
- 7 Feedback on summative work should still allow students to improve their performance in future units
- 8 Online submission of work allows you to provide electronic feedback in a variety of ways – ask your eLearning Team
- 9 Use TurnitinUK (via Blackboard) to enable online submission of assignments, and to identify plagiarism and poor practice
- 10 Provide feedback through the TurnitinUK Grademark tool – it can help provide prompt feedback on summative assignments and coursework
