Supporting and representing flood risk communities

LAUNCH EVENT *SIX STEPS TO FLOOD RESILIENCE*

Birmingham, June 4th 2013
10:30 - 2:30

A JOINT EVENT FROM THE NATIONAL FLOOD FORUM AND THE UNIVERSITY OF MANCHESTER

Join us for the launch of new and independent guidance on how to better protect households and properties from flooding. Aimed at local authorities and flood risk professionals, the guidance provides a step-by-step process to the use of property-level technologies, from surveying through to maintenance and operation.

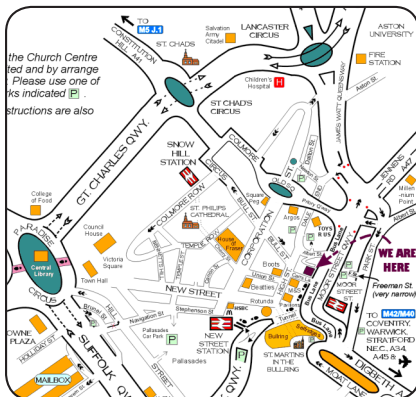

Drawing upon European Union funded research*, the event provides a timely opportunity to consider how innovative products can help communities to increase their resilience to flooding, especially with the uncertainty of a changing climate.

BENEFITS FOR THE AUDIENCE

Attendees will get a clear insight into how the guidance can be used with time to ask questions. With representatives from academia, the flood protection industry and Lead Local Flood Authorities, there will be opportunities for sharing best practice and networking with others.

CONFIRMED SPEAKERS INCLUDE

Stephen Garvin (BRE)
Iain White (The University of Manchester)
Paul Cobbing (The National Flood Forum)

There is no charge for the event and lunch is included. However, places are strictly limited.

Please contact
angela.connelly-2@manchester.ac.uk
or
amanda.davies@floodforum.org.uk
to reserve your place.
